

**MAQUATOR COMBI**

- Solve each of the three puzzles by finding equations represented by number rows horizontally, vertically or diagonally.
- Add in operators plus, minus, multiply, divide and equal sign to find a solution i.e. an equation. Write the solutions on the lines for each grid.
- A number row can represent different equations but only counts once as solution e.g. below  $752 \Rightarrow 7 - 5 = 2$  or  $7 = 5 + 2$ .

4	9	7	Minimum 6
1	4	5	
3	5	8	

_____	_____	_____	1	7	2	3	Minimum 10	_____
_____	_____	7 = 5 + 2	4	5	5	9		_____
_____	_____	_____	2	5	4	2		_____
_____	_____	_____	1	8	9	2		_____

3	0	2	5	3	Minimum 18	_____
9	1	7	1	6		_____
3	2	7	9	1		_____
5	6	3	5	9		_____
4	3	4	4	1		_____
